Water Dreams

*The traditional,
aristocratic
reinforced-concrete
pool ... or modern,
functional
prefabricated
panels pool?
Whatever your
chosen construction
technique, Culligan
water will make it
really wonderful.*

Even inside your home,
water is the most charming
and natural among the
decorative elements.

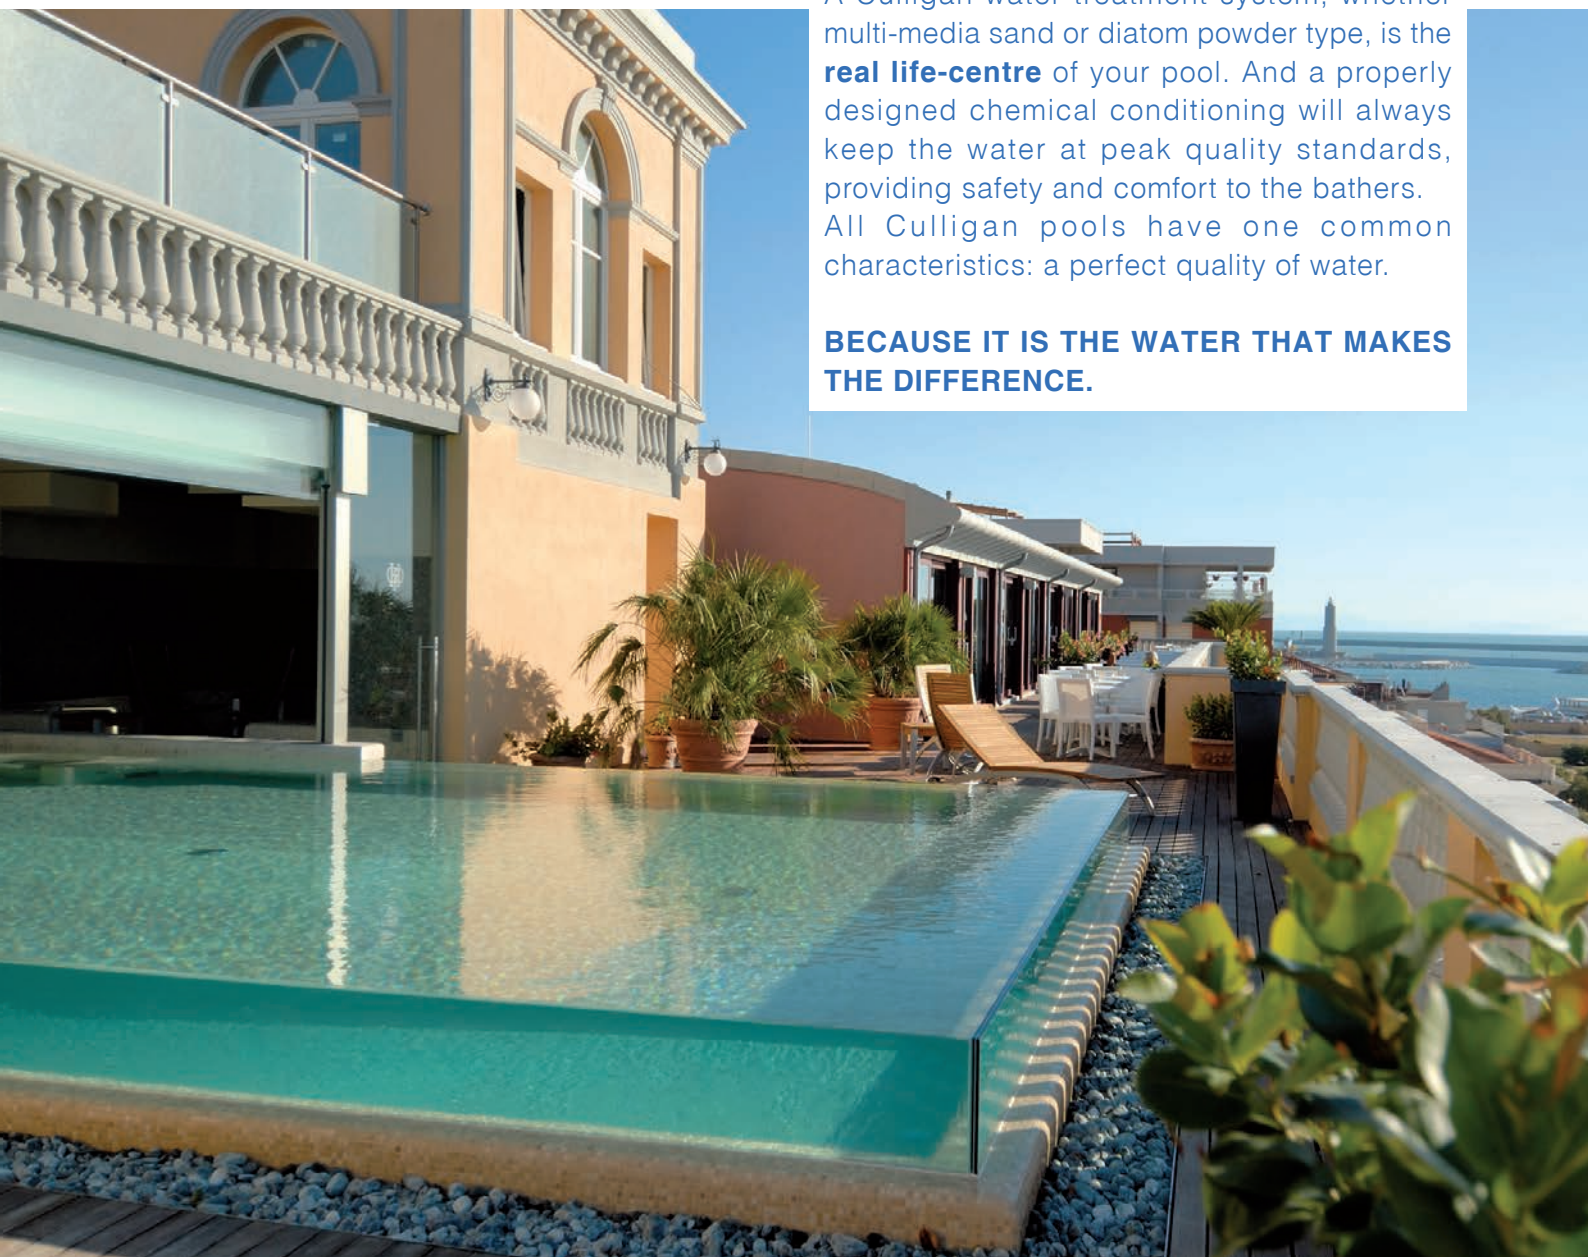

For more than forty years, Culligan has been designing state-of-the-art swimming pools with outstanding technical and aesthetic qualities. Whether private or public, for hotels or clubs, thermal or competition, pools have different specifications according to the needs and wishes of customers.

Culligan always finds the answer to achieve your dreams: essential or luxurious, sporty or relaxing, **our pools are a perfect combination of technology, beauty and comfort.**

You can choose from a reinforced-concrete pool, with long life and coating as you wish, or decide for a modern and practical prefabricated panels pool, speedy to realize and saving realization's cost. Simple and lazing, with complex or essential architectural style, **every pool is different** and like a house it reflects its owners' personality and lifestyle. Wonderful water for a wonderful way of life.

A Culligan water treatment system, whether multi-media sand or diatom powder type, is the **real life-centre** of your pool. And a properly designed chemical conditioning will always keep the water at peak quality standards, providing safety and comfort to the bathers. All Culligan pools have one common characteristics: a perfect quality of water.

BECAUSE IT IS THE WATER THAT MAKES THE DIFFERENCE.

the life-centre of the system

Semiautomatic and Automatic multi-media Filter

MULTI-MEDIA FILTER

DIATOMACEOUS EARTH FILTER

SELF-PRIMING ELECTRIC PUMP

Culligan completes its range with everything it takes to run your pool simply, effectively and automatically. **Filtration and chemicals' feeding** can be timed by an electrical panel so that the water transparency,

pH and residual Chlorine are constantly at peak values, which can all be controlled and monitored by special instruments. The Culligan catalogue contains all **accessories** for **distributing** and **recycling** the

water, as well as for **lighting the pool**, and there is also a full range of **specific chemicals**.

The **pool** can be **cleaned** by hand, using the special vacuum-cleaners, or automatically by the bottom-cleaning robots, available in a choice of models. As a final touch of luxury, the range also features **counter-flow swimming** devices, **hydromassage** systems and a range of **fountain** fixtures and **multicolour led underwater lights**.

QUALITY SYSTEM CERTIFIED ACCORDING TO UNI EN ISO 9001:2008 NORM

Culligan reserves the right to change any technical or design specifications for the models shown in this brochure.

Culligan Guarantee – Any manufacturing defects and corrosion are covered by the Culligan guarantee's norms.
